

Tachus 50/10 ETS

One target unit for 50 m rifle and 10 m air events.

Most ranges have to choose. A 10 m lane cannot score a 50 m rifle, and a 50 m lane stands idle when the air shooters arrive. The usual answer is to buy two electronic target systems and find the space for both.

The Tachus 50/10 ETS does both from one unit. Swap the front door: 1.5 mm for the 10 m air events or 5 mm for 50 m rifle. The lane is ready for the other discipline in about ten minutes. The same acoustic detection, the same scoring software, one purchase.

Tachus 50/10 ETS units on their stands at a covered range

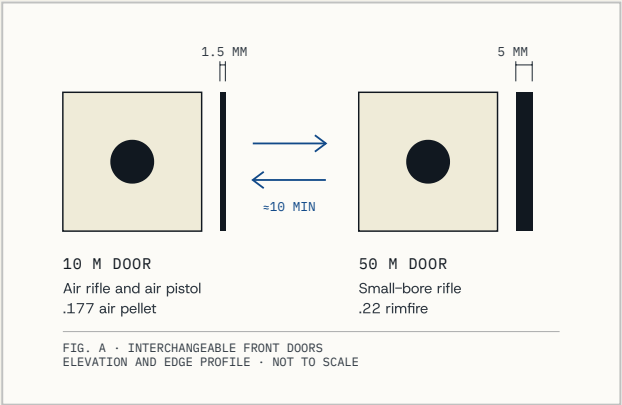

Fig. 01

DISTANCES	EVENTS	CHANGEOVER	WARRANTY
50 m and 10 m Convertible	50 m rifle 10 m air rifle 10 m air pistol	About 10 minutes Front-door swap	2 years Extendable to 8

01 / CONVERSION Two doors, one machine.

Fit the 1.5 mm front door for the 10 m air events or the 5 mm door for 50 m rifle. The acoustic sensors, paper feed, illumination, cable and scoring software remain in place. Range staff can complete the change at the start of a session without a service visit.

- 01 Take off the front door currently fitted.
- 02 Fit the door for the other discipline.
- 03 The lane is ready in about ten minutes.

02 / BENEFITS

What the range gets out of it.

01

One lane, two disciplines

Use the same lane for 10 m air events and 50 m rifle. Changeover takes about ten minutes.

02

One purchase instead of two

Install one target system instead of separate systems for 10 m and 50 m.

03

One system to learn

Both configurations use the same scoring application and operating routine.

03 / SOFTWARE

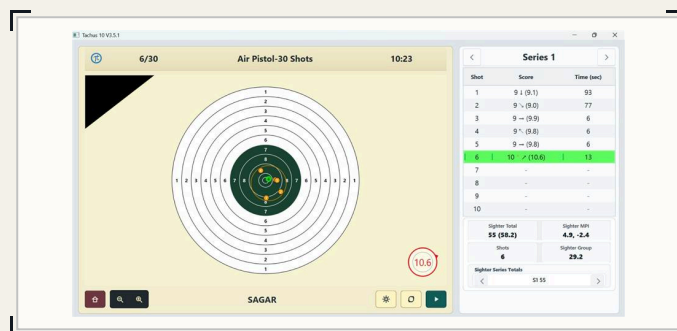

Scores, series and shot patterns.

Each unit connects by cable to a Windows laptop or PC at the firing point. Shots appear as they land: the score, the position on the target face, the series and the session total. Results come through near-instantaneously over the cable, and sessions can be personalised to the shooter.

Windows scoring software: real-time shot display at the firing point.

Android application: optimized for tablets in portrait orientation.

Tachus 50 3P: applications for Windows and Android for training across the kneeling, prone and standing positions.

04 / SPECIFICATIONS

Specifications.

DISTANCES	50 m and 10 m (convertible)
EVENTS	50 m rifle, 10 m air rifle, 10 m air pistol
AMMUNITION	.177 air pellet at 10 m; .22 small-bore rifle at 50 m
DETECTION	Acoustic sensors with auto-advancing paper roll
FRONT DOORS	Interchangeable: 1.5 mm (10 m) and 5 mm (50 m)
CHANGEOVER	About 10 minutes
ILLUMINATION	Customisable built-in LED

CONNECTION	Cable to a Windows laptop or PC at the firing point
APPLICATIONS	Windows scoring software; Android tablet application (portrait orientation)
3P TRAINING	Tachus 50 3P applications for Windows and Android
SUPPLIED	Target unit with both front doors, mounting stand and software
INSTALLATION	On-site by Tachus; one lane installation covers both distances
WARRANTY	2 years, extendable up to 8 years

Next step Tell us about the lane you are planning, and we will quote for it.
